4+ Years experienced IT professional with proficiency in EDI Implementation, Integration, and Migration, expertise in configuring production grade B2B/EDI communication processes to deliver market value. I excel in optimizing, validating and managing EDI transactions through testing, and ensuring data accuracy that enhance operational workflows and drive business growth. Co-founder of Feeding Nation, which is Nagpur based NPO, the passion for creating something for the NGO community drives me to go ahead.

KEY SKILLS

Implementation | Configuration | API Integration | Supplier Migration | Monitoring | Periodic Report Generation | Remote Processing Automation | Data Mapping | Programming

TOOLS & TECHNOLOGIES

Framework: SEEBURGER, WEBEDI, GEBIS, Service Now | **Scripting Languages:** Python, Bash | **Database Management System:** PostgreSQL, SQL, **Database:** RDBMS, NoSQL | **Container Orchestration:** Docker, Kubernetes | **Version Control:** Git, GitHub, GitLab | **Platform:** Azure DevOps, AWS Cloud, GCP

PROFESSIONAL EXPERIENCE

Associate Consultant/EDI Consultant Capgemini	Bangalore, IN Nov 2021 – Present
RPA Developer Intern Predikly	Pune, IN Aug 2021 – Sep 2021

PROJECTS

Migrating Supply Chain Disruptions, Software Engineer

- Executed new connection, implement data collective via supplier portal, coordinating across the teams to meet project timelines readiness requirements.
- Managed and supported multiple EDI communication protocols and connections, including **VAN, AS2, OFTP2, HTTPS, and SFTP**.
- Implemented standard EDI transaction sets such as **EDIFACT, 810 (Invoice), 830(Delfor's), 856(ASN)**.
- Orchestrated new supplier onboarding from one system to another by performing connection testing and maintain SEEDELFOR's file flow between production and customer ends.
- Enabled successfully go-live for UD Trucks and Volvo supplier, by managing the phased migration of partners to clone system, ensuring minimal disruption.
- Engaged in direct client discussions to gather requirements and address issues effectively.
- Served as the primary EDI point of contact for external trading partners and internal stakeholders.
- Supports more than **200+ supplier migration** from Volvo to UD Trucks environment by ensuring the correct configuration and giving **24/7 monitoring** supports by maintaining congenial and weekend shifts.
- Provided robust technical support for the **Web EDI application** ongoing operations by handling and resolving **20 SNOW tickets** per day by giving system access and provide proper support to increase productivity.
- Responsible for daily report generation using **MT (Message Tracker)**.
- Collaborated with stakeholders to gather raw data, successfully completing the **INVOICE test** and deploying it within the QA and PROD environment.
- Streamlined to Integration efforts by validating workflows, resolved connectivity issue by ensuring seamless connections between platforms.
- Utilized EDI tools and platforms to monitor, troubleshoot, and optimize EDI workflows.
- Design supplier evaluation, risk assessment and due diligence.
- Managed support mapping tasks to ensure correct routing, ownership and alignment with internal support structures.

Employee Management System

- Developed and deployed a streamlined web application for efficient organization and manipulation of employee data using **Java 11**, **Spring Boot**, and **PostgreSQL** for robust data storage.
- Designed the front-end using **Thyme leaf** for dynamic web content rendering, integrating the entire system seamlessly within the **Eclipse IDE** for ease of development and maintenance.
- Implemented full **CURD (Create, Read, Update, Delete)** functionality, enabling comprehensive data management and effortless employee onboarding via a user-friendly “Add New Employee” form.
- Engineered interactive user interface elements, including dedicated “Update “and “Delete” buttons for seamless record maintenance and data integrity.

RPA (Remote Processing Automation) Solution

- Completed two months of internship as an RPA Developer, gained the hands-on experience with automation technologies.
- Responsible for designing, developing and deploying software bots to automate repetitive business processes.
- Strengthen my technical knowledge in RPA tools and enhance my understanding of process optimization through automation.

CERTIFICATIONS

- AZ-400: Designing and Implementing Microsoft DevOps Solutions
- AZ-104: Microsoft Azure Administrator
- AZ-900 Microsoft Certified: Azure Fundamentals
- AWS Certified Cloud Practitioner

EDUCATION

- **Post-Graduation Diploma – Cloud Computing** | Rashtrasant Tukadoji Maharaj Nagpur University, Nagpur | 2021 | 87.08%
- **Degree – Bachelor of Computer Application** | Dr. Ambedkar College, Nagpur | 2020 | 74.40%
